IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

RECEIVED
CENTRAL FAX CENTER

JAN 07 2005

In the application of: Ringeisen et al.

Serial No.: 10/068,364

Filed: 02/08/2002

For: GENERATION OF BIOMATERIAL MICROARRAYS BY LASER TRANSFER

Examiner: Fuller, Eric

Art Group Unit: 1762

Honorable Commissioner of Patents

PO Box 1450

Alexandria, VA 22313-1450

January 7, 2005

REPOSENSE TO FINAL REJECTION

Sir:

In response to the Office action of 11/26/2004, setting a three month shortened statutory period of reply, please consider the following remarks.

Claims 1-18 and 21-44 are pending in the application. No claims are presently allowed. Claim 26 has been objected to, but has been held to be allowable if rewritten in independent form.

Claim Rejections – 35 U.S.C. § 103

Claims 1-7, 13-18, 22-25, and 27-44 have been rejected under 35 U.S.C. § 103(a) as being allegedly unpatentable over Joyce, Jr. et al., US 5,292,559 in view of Bills et al., US 5,308,737, in further view of Baer et al., US 6,495,195 and Mayer, US 6,159,832.

Claim 1 is directed to a method of creating a microarray by laser deposition. Laser energy desorbs a portion of a composite at a defined target location on a target substrate. The composite comprises a mixture of matrix material and transfer material. The desorbed composite is deposited onto a receiving substrate.

CERTIFICATE OF FACSIMILE TRANSMISSION

I certify that this correspondence is being facsimile transmitted to the US Patent and Trademark Office on the date shown below.
